Individual Team Effort Report

PHYS 201L | Submit privately through the LMS with each team notebook

Purpose: Describe contributions candidly and specifically. This report is private. It may be used with instructor observations to adjust an individual grade when participation differs materially from the team's submitted work.		
Your name: Brandon Banks	**Team name: Science Guys**	**Experiment number and title: Lab 4 newtons second law**
First lab date: 10/5/26	**Second lab date: 10/19/26**	**Submission date: 10/19/26**

Contribution areas

Check every area in which you made a substantive contribution:

✅Planning / physical model	✅ Apparatus setup / safety	✅ Calibration / troubleshooting
✅ Data collection	☐ Data-quality checks	☐ Coding / calculations
☐ Uncertainty analysis	☐ Tables / figures	☐ Writing / editing / GitHub save

Team effort estimate

List every team member, including yourself. Percentages must total 100%. Describe observable work rather than personality or effort alone.

Team member	Estimated share	Specific contributions to this experiment
Jacob	%40	He did most of the coding and writing on this assignment. He wrote the report and did all the github work. Wrote most information down in the code and did a lot of the translating.
Treshun	%20	Trey did a few of the calculations and helped with the actual doing of the experiment. He wrote down the values and helped keep track of everything.
Brandon	%20	I was someone that helped with the airtrack and tracking of weights. Measuring the weights and keeping track of the order and amount of trials done at a time.
Keith	%20	Keith also did a lot of the airtrack work especially with the cart and making sure it was ready and in place for the trials.
TOTAL	**100%**	

Your contribution

Describe the most important work you personally completed. Identify specific measurements, calculations, code, figures, or writing.

Getting the weights on the airtrack and working out the physical use of the cart on the air track as well. Obtaining measurements of weights that were put on the string to weigh down the cart.

Describe one decision, problem, or check in which your contribution improved the team's result.

By doing the physical part of the measurements, maintaining the weights of the cart and the weight on the end of the string, Jacob was able to focus on keeping track of the values and keeping up with the measurements in the code.

Team functioning and certification

If participation was substantially uneven, or if the instructor should know about a team problem, explain briefly. Otherwise write 'No concerns.'

NO CONCERNS **Certification:** I have reported contributions honestly and understand that this form is an individual academic submission. Signature: Brandon Banks Jr Date: 10/19/26
