Individual Team Effort Report

PHYS 201L | Submit privately through the LMS with each team notebook

Purpose: Describe contributions candidly and specifically. This report is private. It may be used with instructor observations to adjust an individual grade when participation differs materially from the team's submitted work.		
Your name: Keith Seth Davis	**Team name: Science Guys**	**Experiment number and title:** Lab04_Air_Track_Newtons_Second_Law
First lab date: 10/5/2026	**Second lab date: 9/19/2026**	**Submission date: 9/19/2026**

Contribution areas

Check every area in which you made a substantive contribution:

☐ Planning / physical model	☐ Apparatus setup / safety	☐ Calibration / troubleshooting
☐ Data collection	☐ Data-quality checks	☐ Coding / calculations
☐ Uncertainty analysis	☐ Tables / figures	☐ Writing / editing / GitHub save

Team effort estimate

Team member	Estimated share	Specific contributions to this experiment
Trey	**25%**	He adjusted the weights on the end of the pulley system throughout each experiment. Ensuring the data collected was accurate and swift.
Jacob	**25%**	He was the main figure inputting the raw data into the google collab. He also help clarify the experiment procedures and ensured the experiment was running smoothly. He also measrured some of the weights.
Brandon	**25%**	He recorded the experiment results, and weights of the objects. He also helped with setting up each trail.
Keith	**25%**	I helped by weighing each of the objects we used throughout the experiment, setting up the devices we used, and helping trey setup the experiment after each trail
TOTAL	**100%**	

List every team member, including yourself. Percentages must total 100%. Describe observable work rather than personality or effort alone.

Your contribution

Describe the most important work you personally completed. Identify specific measurements, calculations, code, figures, or writing.

The most important work I personally did was data collection. I ensured that we collected precise data using the meter stick. I measured the height of the projectile cannon in all different scenarios. These were key components of information needed for the experiment. I also helped set up the experiment, such as the box and the paper. I also did a little bit of writing down the data in the second scenario. Most importantly, I measured how far the projectiles traveled.

Describe one decision, problem, or check in which your contribution improved the team's result.

__

Jacob was confused on the procedures on the experiment and throught we didnt have to record each handing weight with five trails. I caught his mistake and helped the team get accurate results.

Team functioning and certification

If participation was substantially uneven, or if the instructor should know about a team problem, explain briefly. Otherwise write 'No concerns.'

_____No concerns_____

_____ **Certification:** I have reported contributions honestly and understand that this form is an individual academic submission. Signature: _____KEITH DAVIS_____ Date: 9/14/2026_____
