Individual Team Effort Report

PHYS 201L | Submit privately through the LMS with each team notebook

Purpose: Describe contributions candidly and specifically. This report is private. It may be used with instructor observations to adjust an individual grade when participation differs materially from the team's submitted work.

Your name:	Team name:	Experiment number and title:
Lucas Wienhoff	B6	Lab 4 Air track 2
First lab date: Oct 5, 2026	**Second lab date:** Oct 19, 2026	**Submission date:** Oct 19, 2026

Contribution areas

Check every area in which you made a substantive contribution:

☒ Planning / physical model	☒ Apparatus setup / safety	☒ Calibration / troubleshooting
☒ Data collection	☒ Data-quality checks	☐ Coding / calculations
☒ Uncertainty analysis	☐ Tables / figures	☒ Writing / editing / GitHub save

Team effort estimate

List every team member, including yourself. Percentages must total 100%. Describe observable work rather than personality or effort alone.

Team member	Estimated share	Specific contributions to this experiment
Lucas	40 %	I decided which weight configurations to use, set them up, and maintained the quality of each measured attempt. and writing
Myles	40 %	recorded and converted data, initiated each measured attempt, and writting.
Kaiden	20 %	helped out with setting up each measured attempt on the second day. trouble shooting, and writting.
TOTAL	**100%**	

Your contribution

Describe the most important work you personally completed. Identify specific measurements, calculations, code, figures, or writing.

For this experiment, I believe that the most important thing that I personally did was calibration work and quality control for each experiment. By that, I mean I assisted in the checking of the sensors, and the choosing of which weights to use, in which order.

Describe one decision, problem, or check in which your contribution improved the team's result.

One decision I made was to correct one of the conversions to help with problem solving some very odd data.

Team functioning and certification

If participation was substantially uneven, or if the instructor should know about a team problem, explain briefly. Otherwise write 'No concerns.'

No

Certification: I have reported contributions honestly and understand that this form is an individual academic submission.
